

# List of Municipalities That Restrict Smoking at Public Events

## March 2018

According to the U.S. Surgeon General, secondhand smoke exposure is harmful at any level. Therefore, many cities and counties in California have taken steps to protect their residents from this danger by passing ordinances that restrict smoking in outdoor areas where people congregate, such as fairs, farmer's markets, parades, concerts and other similar events that take place on public property. There are 145 municipalities in California that have restricted smoking at public events. The table below lists all of these cities and counties and divides the policies into three categories:

### 1. Municipalities that prohibit smoking at all public events

There are 89 municipalities with this type of policy. This is the strongest type of restriction because no designated smoking areas are allowed, ensuring that residents will not be exposed to secondhand smoke at any public event.

### 2. Municipalities that restrict smoking at all public events but allow designated smoking areas

There are 19 municipalities with this type of policy. These jurisdictions allow separate designated smoking areas away from the primary event area. Such policies do a lot to protect people from secondhand smoke, but mean that people can continue to be exposed to secondhand smoke in certain areas at public events.

### 3. Municipalities that restrict smoking at some public events

There are 37 municipalities with this type of policy. Examples of this type of policy include restricting smoking only at farmer's markets or outdoor stadiums. While these ordinances do protect people from secondhand smoke exposure at some public events, there is still more that can be done to restrict smoking at and protect residents from secondhand smoke at all public events.

### Other Resources

The Center has other resources on outdoor secondhand smoke ordinances available on our website at:
